

How Technology has affected us (May Myint Hmu)

Introduction

Technology has brought the world closer and better connected. Today, an average middle class family can afford a mobile phone, a television, a washing machine, a refrigerator, a computer, the internet etc.... We cannot escape technology, it has improved the quality of life such as communication transportation, education, healthcare and many more.

Communication

Communication transformed relationships in many ways. We no longer need to rely on sending letters and waiting for several days for a response. Technology has made communication so simple that you can connect with anyone from anywhere by calling them mobile phone or messaging them using different apps that are easy to download.

Today, the internet is used for shopping, paying bills, credit card bills and online banking. In the world of marketing, many companies are marketing and selling their products and creating brands over the internet.

Technology

Introduction:

Technology is bad but good. If you can use it, has you for good. People are Lost by technology.

Bad:

People spend most of the time watching movie and communication via mobile phones. Overuse of mobile phones leads to many problems like damage to the eardrum headache and many more. People are now so addicted to these technological devices that they trust machines more than humans. It is very important to protect yourself and your loved ones from this addiction.

Good:

The world is progressing because technology. Now the world is more advanced than ever. Thanks to technology, people are more intelligent than ever before. Because of technology, people often create various things.

How Technology has affected us (MaEi)

There are many technologies in the world for us. It is an important component of life. And it is useful in different kind of people life today. Nothing can be done without technology. Therefore, technology is a key main for people.

Among many technologies, I would like to talk about the phone as an example. By using it, for example, when you want to talk to someone from away, you can easily communicate with it. You can also learn the knowledge. You want to know from the internet using your phone. Nowadays, there are people who work on the phone. For example, they sell clothes, foods and etc. online. By selling online, you can order by the phone without having to go and buy it yourself. Using it, when you want to meet someone because you remember them, you can connect to the phone and talk to each other face to face when you can't see them from away. That's why you would think that the world small because the technology is so improved. Therefore, I would like to suggest that technology should be studied.

By using the phone, you can connect each other easily, save time and do anything work quickly. Therefore, I want to tell you that technology can have a lot of impact on us.

How technology was affected us (Ei Phyu)

Technology refers to methods , system , and device are the result of scientific knowledge being for practical purpose. Technology is changing fast. The branch is of knowledge that deals with the creation and use of technical means and their interrelation with life, society, and the environment , drawing upon engineering , applied science , and pure science .

I think the advancement of technology is bad . A good example is the phones that are used all over the world today . Most of the youth are spoiled by the games that can be played on that phone .Because of such usage , young people are not longer interested in education .Most people suffer from eye pain due to spending time on the phone .As a result , there are fewer physical activities . If the blood flow is not balanced, health can be seriously affected. The internet is awash with dating sites that are full of people looking for partners and friends. The ease of forming friendships through the internet has discouraged many people from engaging in tradition socializing activities . Secondly , technology has affected the economic statuses of many families because of high rates of unemployment . People lose job when organizations and businesses embrace technology. For example, many employees lose their jobs when manufacturing companies replace them with automated machines that are more efficient and cost effective. Many families are struggling because of lack of a constant stream of income. On the other hand, technology has led to closure of certain companies because the world does not need their services. This is prompted by technological advancements. Technology has elicited heated in the health care doctor. Technology has led to medical practices such as stem cell research, implant embryos and assisted reproduction. Even though these practices have been proven viable, they are highly citizen on the grounds of their moral implications on the society.

There are many controversial medical technologies such as gene therapy, pharmacogenomics and stem cell research. The use of genetic research in finding new cures for disease is imperative and laudable. However, the medical implications of these diseases treatment methods and the ethical and moral issues associated with the treatment methods are critical. Gene therapy is mostly reject by religious people .

How Technology Has Affected Us

Technology is a vital component of in the modern world. People are so dependent on technology that they cannot live without it. Technology is important and useful in all area of human life today. It has made life easy and comfortable by making communication and transform faster and easier.

Today is the computer age. The computer is widely all over the world. Computer technology is applied in every area of life . Around the globe, more and more people have begun to know the usefulness of the computer. The computer has become an essential in today's society and so have computer literacy. So everyone should be computer literate.

Nowadays, almost everything is computerized. Computer skills have become a necessity for all of us. So, everyone should have at least a working knowledge of computer. Students are no exception. There is no field of studies which can escape from the influence of computer technology. So, students should be computer well.

The computer can help students to learn many things. For example, they can learn foreign language through Computer Assisted language learning software. They can also discuss their lesson with their teacher and friends by using the internet. They can take online course and online test as well. The advantages of having computer skills are too numerous to mention. In fact, computer skill are like the wind beneath our wings that will help us fly to greater heights. It is clear that computer literacy plays an important role in education. Computer knowledge is a must for every student if he or she wants to be an outstanding scholar.

How technology in Earth (ThuRaMyoHtet)

Earth is the only planet in the entire Universe that sustains life and Ecosy-STEMs. It is the third closest planet To the sun and the fifth largest Planet in the solar system. It is the also known so the 'Blue planet or the blue marble because 71% of the Earth's surface is covered with water like oceans , seas and large rivers and the rest 29% is covered by lands . However, only 3% of water\$ is freshwater and the rest is saline water of oceans and seas. Earth is one of the eight planets that revolves around the sun . It Takes 365 days to complete its round around sun . It also rotates around its own axis and completes its rotation in 14 hours . In This rotation , we experience day and night . Earth is the habitat

of millions of species . It is the only planet that provides air and water . so, it is our responsibility to save the earth and its powerful resources so as to live happily on the planet,

How Technology Has Affected Us (NuNuHtway)

Technological has led to introduction of cloning, which is highly controversial because of its ethical and moral implications. The growth of technology has changed the world significantly, and has influenced life in a great way. Technology is changing every day and continuing to influence area of communication ,healthcare, governance, education and business.

Over-usage of technology damages the brain systems connecting emotional processing, attention and decision-making. A new study links anxiety, severe depression, suicide attempts and suicide with the rise in use of smartphones, tablets and other devices.

Because of technology (Aung Ye Htat)

Technology is an important part of life in the modern world. People rely too much on technology. For example: car, bicycle, motorcycle, the Internet, computer phone People invented their own art, but people are different from each other. Technology has made the world smaller and a better place to live.

Technology is transportation, Communication Although there are benefits to interactive education technology has negative impacts on the society. example of negative impacts of technology include development of controversial medical practices such as stem cell research and the embracement of solitude due to changes in interaction methods. for example, social media has changed the way people interact.

How Technology has affected us

Introduction

The word "technology" and its uses have immensely changed since the 20th century, and with time, it has continued to evolve ever since. The advancement of technology has

played an important role in the development of human civilization, along with cultural changes.

All of the things that we make use of daily including internet connection, lamps, cars, air conditioners, phones, laptops, bikes, refrigerators and even gas stoves are all products of technology. Technology has made our life easier and smoother. We can get everything just by a single click of our fingers. You can do online shopping, order bread, etc... with cell phones.

If we didn't use technology, there wouldn't be any change in the world today. The world is changing every day with technology.
